## PROJECTS AND RESEARCH

---

**Problem Solving:** Solved many problems with my python skills of Data Structure, Algorithms, OOP and other concepts. Having started to make a habit of being a problem solver in programs. Growing intention to focus on programming contests. Also working on some mini, complex projects

### Web development:

- Currently I am a beginner in this technology, But as a beginner I have built some websites. I am learning different new things and trying to do more projects. As a beginner I have tried building portfolio website, Tictac toe game with CSS animations and JS logics , A landing page for food ordering website , Calculator ect and also working on different projects everyday. I have worked with Raw HTML, CSS and JS for a good amount of time to grow these cor =e strongly. I am now working with React.js , Tailwind CSS and exploring different front-end technologies.
- Contributing on a Fullstack website Project named "Commute Buddy". It was a pre-planned website of mine which I am executing with a 3 members team. Basically its an website to ensure travel safety for individual person by creating community for the proper information flow. I am focusing of the whole fronend part and also working with REST APIs in this project. Its in the fininshing stage.
- Started working on another full stack project which will basically a raw idea generated by me and the website is about creating community for Tree Plantation.

**Research Interest:** My research field is basically AI/ML. I've started exploring through machine learning . I am working on Computer Vision for my thesis . I have plan for doing different research with machine learning.

## SPORTS, AWARDS AND EXTRA CURRICULAR ACTIVITIES

---

- **Sports and Awards:** I have been engaged with different kinds of sports from my school life. I like to play football, Badminton as games. I achieved 15 medals and was the group champion 4 times in school athletics events. I was the "Best athlete" in the whole school twice in my school life. In college life I also won 2 medals in athletics. I played football as a Defender and won so many inter-college matches. In Varsity life, I played for a team in my RS football tournament and finished the tournament as runner-up . I have played badminton in some area-based tournaments and I achieved some good awards.
- **Arts:** I have participated in different art competitions in my school life and achieved some little rewards. I like to draw sketches on paper.

## HOBBIES

---

In addition to everything I love to spend my free time sketching, playing football. I love to do photography. I love to take different pictures of natural substances. I love nature so much. I love to travel in my spare time. I have a plan to travel the world in my future life. Besides I like to play flute sometimes in my leisure.
